LO: To learn the three times table

Threes please!

Draw a picture to help you remember the poem and the table.

Three, six, nine….
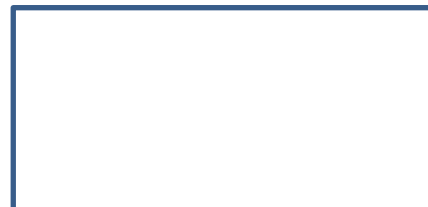

Tell me the time.

Twelve, fifteen, eighteen….

Don't keep me waiting.

Twenty-one and twenty-four…

Someone's knocking at the door.

Twenty-seven, thirty, grin

Now we'd better let them in.

Thirty-three and thirty-six…

Now it's time for tea and bics!

Now fill in these calculations…quickly!! You might need to look at your poem.

0x3=	2x3=	6x3=	4x3=	7x3=	9x3
5x3=	8x3=	1x3=	10x3=	3x3=	11x3=

5 lots of 3=		9 groups of 3=		10 times 3=	

An alien has 3 eyes. If there are 6 aliens, how many eyes are there in total? Write the calculation first. Eg 3x6=		3 children have 8 marbles each. How many stickers do they have in total? Write the calculation first.		Mrs Otway has 12 lollies. She sells them for 3p each. How much does it cost her? Write the calculation first.
