## Diagrams

Story of Theodore Roosevelt and the hunting expedition Where he would not kill a bear. The Teddy Bear was named after him.

100 years ago, a doll was made with a porcelain face and a felt body. Today, dolls are usually made from soft plastic.

Many toys we play with now were not created 100 years ago. Before plastic was used, toys were made of cloth, wood, leather, tin or porcelain. Children might have played with toys such as, tin cars, wooden hoops and leather footballs. They also might have played with board games such as, snakes and ladders.

## Moving toys

Lots of modern toys have batteries which make them move.

Before batteries were invented, many toys that moved had windup power and clockwork devices. This means that you had to turn a key to tighten a spring and then let the spring unwind for the toy to move.
