		<p>Sacred texts, stories and leaders provide followers with guidance on how to live their lives within the principles of their religion. People live in communities respectfully, in our community there are several different religions, and people of no religion. They share ideas about how to care for the environment and live in society. They have different beliefs about how the Earth began, and how we should protect it. Humanists are a group of people who provide guidance on how to live, without a belief in God. They share ideas with people of different religions but do not believe God is responsible. There are people, who throughout history, have helped others regardless of their religious views.</p>
